N5J Jarvis Island DXpedition –update

Since the Dateline DX Association announced plans for activating Jarvis Island this summer many have asked if we could arrange with IOTA and POTA program organizers to secure approval of our DXpedition.

Jarvis is one of the rarest of the IOTA counters, having been off the air for 34 years. It is needed by 82% of IOTA program participants.

Because of the requirements set by the permit of the USFWS, while the stations and antennas and power are all set up on Jarvis Island, the local operators must conduct the DXpedition from the MV Magnet which will still be in the Jarvis Island National Wildlife Refuge just offshore.
